

To Whom it may concern at the FCC:

I've been a subscriber to XM satellite radio for almost a year. The quality and availability of the service is something not offered anywhere else and I pay monthly for this service. I find it appalling that the National Association of Broadcasters is trying to interfere with what I can choose to listen too. It should not be dictated by them as to what is aired and where. I thought that was the FCC's job. I respectfully urge the FCC to reject the NAB's petition 04-160 and I fully support XM's ability to bring me programming that I request.

Send a message to the NAB from me that they should spend their time upgrading the quality of their service and programming rather than bringing these frivolous lawsuits. That's the way to keep listeners. Thank you.

Sincerely,  
Gordon E. Random
